

Magellan

Boxmaker HD

Sizes Available:

66" x 150"

88" x 200"

110" x 250"

Designed specifically for the manufacture of large format corrugated cartons, the Magellan Boxmaker completes short runs of very large cartons easily.

The Magellan produces a complete box blank (including the glue tab) in a single pass using a single operator. This includes the flap scores, the body creases, the flap slots, and trimming both the left side and the end of the sheet, all in a single pass! In addition, the Magellan offers full width flexo printing and sheet stacking as available options.

The Magellan is capable of processing single wall, double wall, and triple wall corrugated simply by adjusting the machine. Sheets larger than the required box blank size can be fed into the machine to be trimmed during the process as well as sheets pre-cut to the proper size beforehand.

Standard Container Styles that can be manufactured by the Magellan Boxmaker:
